POPS: Global LDPE EVA Copolymer Market - 2017

The PolyOlefins Planning Service (POPS) is a subscription providing detailed and insightful analysis of the global polyethylene and polypropylene business since the 1990s.

POPS is recognized globally as the benchmark source for detailed information and analysis of commercial and technological trends and developments in the polyolefin industry. The program is unique in providing detailed market and technology information to support both licensors' and producers' business planning.

The Global LDPE EVA Copolymer Market report provides an in-depth analysis of the EVA market; along with an overview of key trends in LDPE.

To be Published: October 2017

Abstract:

Ethylene vinyl acetate (EVA) copolymers make up a family of products with wide property variation. They range from thermoplastic products, similar to LDPE, to rubber-like products. EVA is produced by the random copolymerisation of ethylene and vinyl acetate (VA) in predetermined ratio. EVA properties are influenced by a few variables, including molecular weight distribution (MWD), VA content, molecular weight.

EVA is mainly used in foam, film (usually blended with other resins) and adhesives. The foam moulding application has a wide range of end-use segments; the footwear industry is now the single largest end-use for EVA copolymers.

EVA resins can be produced by either autoclave or tubular process using LDPE process technology, either in a dedicated EVA or swing LDPE/EVA lines. However, not all LDPE producers produce EVA copolymers, as EVA sales require application development and technical service support.

Currently, there are several LDPE technologies available for license, which give producers the ability to manufacture EVA resins.

Key companies active in the EVA market include ExxonMobil, Hanwha, DuPont, Versalis, Sinopec, etc

Global EVA Demand by Application

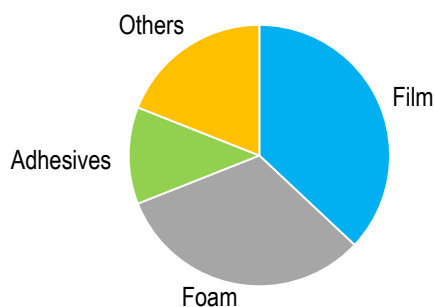

Table of Contents:

1. Executive Summary
2. Introduction
 - 2.1. Industry Overview
 - 2.2. Application Overview
 - 2.3. Production Technology
3. Global LDPE Market Overview
4. EVA Market Analysis
 - 4.1. Global
 - 4.2. North America
 - 4.3. South America
 - 4.4. Western Europe
 - 4.5. Central and Eastern Europe
 - 4.6. Middle East and Africa
 - 4.7. Asia Pacific

Each region in Section 4 is segmented by:

- Consumption: Assesses historic and forecast consumption; forecasts are based on projections of end-use and economic activity.
- Supply: Includes a list of all producers, their production capacity, location, etc, and discussion of the status of new projects.
- Supply, Demand and Trade: Provides historical analysis and forecasts to 2035 of consumption, production, imports/exports, inventory build-up/decline, capacity and capacity utilization.

A review of the chemistry and process technology is also included in this report.

Accompanying the report is an Excel file which provides full global capacity listing and supply, demand and trade balances for the 41 countries currently analysed.

NexantThinking Online Database also includes the capacity and supply, demand and trade analysis for over 41 countries, with capacity updated on a monthly basis.

Polyolefins Planning Service (POPS):

The PolyOlefins Planning Service is available on subscription. Analysis is published in a variety of reports during the subscription period and data is included within our Online Database.

Reports include:

- Global Commercial Analysis
 - One data set published in Q4
 - One data set published in Q2
- Quarterly Business Update
- Ad-hoc Reports
 - Three unique issue driven reports are included during a 12-month subscription period, including Global LDPE EVA Copolymers - 2017.

Reimagine tomorrow.

NexantThinking™

NexantThinking reports and subscription programs provide clients with comprehensive analytics, forecasts and insights for the chemicals, polymers, energy and cleantech industries. Using a combination of business and technical expertise, with deep and broad understanding of markets, technologies and economics, NexantThinking provides solutions that our clients have relied upon for over 50 years.

Global in scope, Nexant serves its clients from over 30 offices located throughout the Americas, Europe, the Middle East, Africa and Asia.
