## Carbon Dioxide to Chemicals and Fuels

### Table of Contents

A Report by NexantThinking™

Published October 2017

[www.nexantthinking.com](http://www.nexantthinking.com)

Section	Page
1 Executive Summary .....	1
1.1 OVERVIEW .....	1
1.2 TECHNOLOGIES .....	3
1.3 ECONOMICS .....	4
1.3.1 USGC .....	6
1.3.2 South America .....	8
1.3.3 Western Europe .....	8
1.3.4 Asia .....	9
1.4 CARBON DIOXIDE UTILIZATION AND END OF LIFE .....	11
1.4.1 Overview .....	11
1.4.2 Global Analysis .....	11
2 Introduction .....	17
2.1 SEGMENTATION OF SOURCES .....	18
2.2 DISPOSITION OF CARBON DIOXIDE .....	18
2.3 PRODUCTS FROM CARBON DIOXIDE .....	19
2.3.1 Existing Uses .....	20
3 Technologies .....	23
3.1 ORGANIC CARBONATES .....	23
3.1.1 Ethylene Carbonate .....	23
3.1.2 Dimethyl Carbonate .....	25
3.1.3 Polycarbonates .....	28

3.1.4	Key Players .....	36
3.2	DRY REFORMING AND SYNGAS .....	38
3.2.1	Key Players .....	44
3.3	UREA.....	44
3.3.1	Key Players .....	47
3.4	METHANOL .....	49
3.4.1	Key Players .....	55
3.5	SODA ASH.....	55
3.6	BIOTECHNOLOGY FEEDSTOCK.....	59
3.6.1	Succinic Acid .....	60
3.6.2	Algae Technology.....	85
3.6.3	Syngas Fermentations .....	135
3.7	ELECTROCHEMICAL CONVERSION OF CO <sub>2</sub> .....	149
3.7.1	Formic Acid .....	149
3.7.2	DMC .....	153
3.7.3	Liquid Light/Avantium .....	154
3.7.4	Others.....	156
3.8	CEMENT .....	156
3.8.1	Calera.....	156
3.8.2	Carbon Sense Solutions .....	160
3.8.3	Novacem .....	160
3.8.4	Other Minor Players .....	161
3.8.5	Key Players .....	161
3.9	OTHER USES .....	162
3.9.1	Salicylic Acid .....	162
3.9.2	CO <sub>2</sub> as a Solvent .....	164
3.9.3	Other.....	165
4	Economics.....	168
4.1	METHODOLOGY .....	168
4.1.1	Operating Cost Elements .....	168
4.2	PRICES .....	170
4.3	COMPARISON OF CAPEX.....	171
4.4	COMPARATIVE ANALYSIS BY REGION .....	171
4.4.1	USGC .....	173
4.4.2	South America.....	178

4.4.3	Western Europe .....	183
4.4.4	Asia.....	187
4.5	COMPARATIVE ANALYSIS BY PROCESS.....	191
5	CO <sub>2</sub> Utilization and End of Life.....	197
5.1	OVERVIEW .....	197
5.2	GLOBAL ANALYSIS .....	197
5.2.1	CO <sub>2</sub> Utilization Potential .....	197
5.2.2	CO <sub>2</sub> End of Life Potential .....	200
5.3	NORTH AMERICAN ANALYSIS.....	203
5.3.1	CO <sub>2</sub> Utilization Potential .....	203
5.3.2	CO <sub>2</sub> End of Life Potential .....	203
5.4	SOUTH AMERICAN ANALYSIS .....	205
5.4.1	CO <sub>2</sub> Utilization Potential .....	205
5.4.2	CO <sub>2</sub> End of Life Potential .....	206
5.5	WESTERN EUROPE ANALYSIS .....	207
5.5.1	CO <sub>2</sub> Utilization Potential .....	207
5.5.2	CO <sub>2</sub> End of Life Potential .....	208
5.6	ASIA ANALYSIS.....	209
5.6.1	CO <sub>2</sub> Utilization Potential .....	209
5.6.2	CO <sub>2</sub> End of Life Potential .....	210
6	References .....	211

<b>Figure</b>	<b>Page</b>
1.1 Carbon Stabilization Wedges .....	2
1.2 USGC Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	7
1.3 Brazil Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	8
1.4 Western Europe Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	9
1.5 China Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	10
1.6 World CO <sub>2</sub> Utilization Potential, Composite Model .....	12
1.7 World CO <sub>2</sub> Utilization Potential for Carbon Credits at US\$100 or less, Composite Model ....	12
1.8 World CO <sub>2</sub> Utilization Potential for Carbon Credits US\$0 to US\$100, Composite Model.....	13
1.9 World CO <sub>2</sub> Utilization Potential, World Leader Model .....	13
1.10 World CO <sub>2</sub> Utilization Potential for Carbon Credits less than US\$100, World Leader Model .....	14
1.11 World CO <sub>2</sub> End of Life Potential, Composite Model .....	14
1.12 World CO <sub>2</sub> Utilization Potential for Carbon Credits at US\$100 or less, Composite Model ....	15
1.13 World CO <sub>2</sub> Utilization Potential for Carbon Credits US\$0 to US\$100, Composite Model.....	15
1.14 World CO <sub>2</sub> End of Life Potential, World Leader Model .....	16
1.15 World CO <sub>2</sub> End of Life Potential for Carbon Credits less than US\$100, World Leader Model .....	16
2.1 Carbon Stabilization Wedges .....	17
3.1 Ethylene Carbonate Production .....	24
3.2 Asahi Kasei Ethylene Carbonate Transesterification with Methanol.....	27
3.3 Asahi Kasei/Chi Mei Melt Polycarbonate Process .....	31
3.4 Conventional Steam Methane Reforming .....	40
3.5 Block Flow Diagram for Combined CO <sub>2</sub> and Steam Methane Reforming.....	41
3.6 Sandia's CR5 .....	43
3.7 Urea Yield as a Function of NH <sub>3</sub> /CO <sub>2</sub> Ratio .....	46
3.8 Conversion of Carbon Dioxide to Urea at Different Temperatures .....	46
3.9 Snamprogetti Ammonia Stripping Process for Urea .....	48
3.10 Bench Scale 50 kg per day Methanol Synthesis Plant .....	51
3.11 Electrolytic Methanol Synthesis.....	53
3.12 Solvay Process Block Flow Diagram .....	57
3.13 Refined Sodium Bicarbonate Process Flow Diagram .....	58
3.14 Cell Metabolic Carbon Balance .....	59

3.15 Major Metabolic Pathways in a Typical Cell.....	62
3.16 Central Glucose Metabolic Pathway in a Typical Cell.....	63
3.17 Anaerobic Degradation of Pyruvate .....	65
3.18 Glyoxylate and TCA Cycles.....	66
3.19 Oxidative and Reductive TCA Branches .....	67
3.20 Calculations for Maximum Anaerobic Theoretical Yield from Glucose .....	69
3.21 Calculations for Maximum Theoretical Combined Pathway Yield from Glucose .....	70
3.22 Calculations for Maximum Oxidative and Reductive Theoretical Yield from Glucose .....	71
3.23 BioAmber Plant in Sarnia, Canada .....	73
3.24 BioAmber Fermentation Process Flow Diagram .....	77
3.25 BioAmber Succinic Acid Purification Flow Diagram .....	78
3.26 Succinity Semi-commercial Plant in Montmelo, Spain .....	79
3.27 Succinity’s Assumed Pathways to Biosuccinic Acid .....	80
3.28 Succinity Fermentation Simple Flow Diagram .....	83
3.29 Succinity Purification Simple Flow Diagram .....	84
3.30 Photosynthesis in Algae .....	91
3.31 PAR Wavelengths .....	92
3.32 Photosynthetic Efficiency of Algae .....	93
3.33 Light Penetration in Water of the Absorbable Spectrum.....	94
3.34 Optical Density Photo-Inhibition .....	94
3.35 Metabolic Pathways .....	96
3.36 Micrographs of Algae before (Left) and After (Right) Oil Accumulation.....	96
3.37 Scripps Research Institute’s Proposed Algae System .....	100
3.38 Raceway Algae Pond Diagram .....	102
3.39 Raceway Algae Pond .....	102
3.40 Round Pond.....	103
3.41 Some Microalgae Species Currently in Commercial Production .....	103
3.42 Selected Open Pond Algae Projects Currently in Operation .....	104
3.43 Some of the Different Types of Closed Systems for Algal Cultivation .....	105
3.44 Solix’s Closed System for Algae Cultivation .....	105
3.45 NASA’s “Open-Ocean” Photobioreactors.....	106
3.46 Solazyme/TerraVia’s Lab-Scale Fermenter .....	107
3.47 Metabolic Pathway Used Heterotrophic Algae Growth Systems .....	108
3.48 Algae’s Role in Ocean Dead Zones .....	109
3.49 Algae Removal in China.....	110

3.50	Overlay of Global Stationary Sources of CO <sub>2</sub> Emissions and Net Surface Solar Radiation .....	111
3.51	Distribution of Stationary Sources of Carbon Dioxide .....	114
3.52	Electric Power Plant Location Relative to Average Annual Solar Hours Received .....	115
3.53	JAXA Analysis of Global CO <sub>2</sub> Emissions .....	116
3.54	Algae Oil Production Options .....	119
3.55	Algae Oil Energy Requirements .....	119
3.56	Auto-Flocculation of Algae .....	120
3.57	AlgaeVenture Systems Harvester .....	121
3.58	Algae Dried Using AlgaeVenture Systems Harvester .....	122
3.59	Lysis in Algae .....	123
3.60	Diagram of an Oil Expeller .....	124
3.61	Algae Oil Separation via Ultrasonics .....	124
3.62	Origin Oil's Extraction Process .....	125
3.63	Sponge-Like Nanoparticles for Algal Oil Extraction .....	125
3.64	Tilapia .....	127
3.65	Brine Shrimp and Algae .....	127
3.66	Sapphire Energy's Process Overview .....	131
3.67	Reductive Acetyl-CoA Pathway .....	137
3.68	300-Ton Pre-commercial Plant at Baosteel Mill near Shanghai .....	139
3.69	LanzaTech's Product Platform .....	140
3.70	Indian River County Bioenergy Center .....	143
3.71	Kiverdi Reactor Design .....	147
3.72	Two Possible Kiverdi Reactor Process Configurations .....	148
3.73	Representative Schematic of ECFORM Reactor .....	150
3.74	Mantra ERC System .....	151
3.75	Representation of a Flow through Photocatalyst Array .....	153
3.76	Block Flow Diagram for Liquid Light's CO <sub>2</sub> to Chemicals – Electrochemical Cell .....	154
3.77	Block Flow Diagram for Liquid Light's CO <sub>2</sub> to Chemicals – Second Reactor .....	155
3.78	Calera "Cement" Production Pilot Plant .....	157
3.79	Solubility of Carbon Dioxide in Water at Different Pressures/Temperatures .....	158
3.80	CO <sub>2</sub> Speciation and Solubility at 25 °C and P(CO <sub>2</sub> ) 0.1 MPa with a Total Carbon(IV) Activity = 1 .....	159
3.81	Simplified Salicylic Acid Production by Kolbe-Schmitt Method .....	163
3.82	Pressure –Temperature Diagram of Carbon Dioxide Illustrating the Critical Point .....	165
3.83	Ammonium Sulfate and Calcium Carbonate Production Process Flow Diagram .....	166

4.1	CO <sub>2</sub> to Chemicals and Fuels - USGC Economic Competitiveness.....	173
4.2	USGC Carbon Dioxide Consumption versus Return and Showing Capital Efficiency.....	175
4.3	USGC Carbon Dioxide Consumption versus Return and Showing Capital Efficiency, Excluding Liquid Light and Cement.....	175
4.4	USGC Carbon Dioxide Consumption versus Return and Showing Capital Efficiency for Technologies with Positive Returns .....	176
4.5	CO <sub>2</sub> to Chemicals and Fuels Brazil Economic Competitiveness .....	178
4.6	Brazil Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	180
4.7	Brazil Carbon Dioxide Consumption versus Return and Showing Capital Efficiency, Excluding Liquid Light and Cement.....	180
4.8	Brazil Carbon Dioxide Consumption versus Return and Showing Capital Efficiency for Technologies with Positive Returns .....	181
4.9	CO <sub>2</sub> to Chemicals and Fuels Western Europe Economic Competitiveness .....	183
4.10	Western Europe Carbon Dioxide Consumption versus Return and Showing Capital Efficiency .....	185
4.11	Western Europe Carbon Dioxide Consumption versus Return and Showing Capital Efficiency, Excluding Liquid Light and Cement .....	185
4.12	Western Europe Carbon Dioxide Consumption versus Return and Showing Capital Efficiency for Technologies with Positive Returns.....	186
4.13	CO <sub>2</sub> to Chemicals and Fuels China Economic Competitiveness .....	187
4.14	China Carbon Dioxide Consumption versus Return and Showing Capital Efficiency.....	189
4.15	China Carbon Dioxide Consumption versus Return and Showing Capital Efficiency for Technologies with Positive Returns .....	189
4.16	Urea via Biogas Comparative Economics by Region .....	192
4.17	Methanol via Biogas Comparative Economics by Region .....	192
4.18	Succinic Acid Comparative Economics by Region.....	193
4.19	Open Pond Algae Oil Comparative Economics by Region .....	193
4.20	PBR Algae Oil Comparative Economics by Region.....	193
4.21	Heterotrophic Algae Oil Comparative Economics by Region.....	194
4.22	Syngas Fermentation to Ethanol Comparative Economics by Region .....	194
4.23	Liquid Light MEG Comparative Economics by Region .....	194
4.24	Corn Ethanol Comparative Economics by Region .....	195
4.25	Sugarcane Ethanol Comparative Economics by Region .....	195
4.26	Ethanol to MEG Comparative Economics by Region .....	195
4.27	Ethylene Carbonate Comparative Economics by Region .....	196
4.28	Cement Comparative Economics by Region .....	196
5.1	World CO <sub>2</sub> Utilization Potential, Composite Model .....	198

5.2	World CO <sub>2</sub> Utilization Potential for Carbon Credits at US\$100 or less, Composite Model ....	198
5.3	World CO <sub>2</sub> Utilization Potential for Carbon Credits US\$0 to US\$100, Composite Model.....	199
5.4	World CO <sub>2</sub> Utilization Potential, World Leader Model .....	199
5.5	World CO <sub>2</sub> Utilization Potential for Carbon Credits less than US\$100, World Leader Model .....	200
5.6	World CO <sub>2</sub> End of Life Potential, Composite Model.....	200
5.7	World CO <sub>2</sub> Utilization Potential for Carbon Credits at US\$100 or less, Composite Model ....	201
5.8	World CO <sub>2</sub> Utilization Potential for Carbon Credits US\$0 to US\$100, Composite Model.....	201
5.9	World CO <sub>2</sub> End of Life Potential, World Leader Model .....	202
5.10	World CO <sub>2</sub> End of Life Potential for Carbon Credits less than US\$100, World Leader Model .....	202
5.11	North America CO <sub>2</sub> Utilization Potential .....	203
5.12	North America CO <sub>2</sub> Utilization Potential for Carbon Credits Less than US\$100 .....	203
5.13	North America CO <sub>2</sub> End of Life Potential .....	204
5.14	North American End of Life Potential for Carbon Credits at US\$100 or less.....	204
5.15	South America CO <sub>2</sub> Utilization Potential .....	205
5.16	South America CO <sub>2</sub> Utilization Potential for Carbon Credits Less than US\$100.....	205
5.17	South America CO <sub>2</sub> End of Life Potential.....	206
5.18	South American End of Life Potential for Carbon Credits at US\$100 or Less.....	206
5.19	Western Europe CO <sub>2</sub> Utilization Potential .....	207
5.20	Western Europe CO <sub>2</sub> Utilization Potential for Carbon Credits Less than US\$100 .....	207
5.21	Western Europe CO <sub>2</sub> End of Life Potential .....	208
5.22	Western Europe End of Life Potential for Carbon Credits at US\$100 or less.....	208
5.23	Asia CO <sub>2</sub> Utilization Potential .....	209
5.24	Asian CO <sub>2</sub> Utilization Potential for Carbon Credits Less than US\$100.....	209
5.25	Asian CO <sub>2</sub> End of Life Potential .....	210
5.26	Asian End of Life Potential for Carbon Credits at US\$100 or less.....	210

<b>Table</b>	<b>Page</b>
1.1 Current Developers of Carbon Dioxide to Chemicals Technologies .....	3
1.2 USGC Returns on Capital Employed (ROCE) .....	7
1.3 Brazil Returns on Capital Employed (ROCE).....	8
1.4 Western Europe Returns on Capital Employed (ROCE).....	9
1.5 China Returns on Capital Employed (ROCE) .....	10
2.1 Non-Transformative Uses of Carbon Dioxide .....	18
2.2 Current Developers of Carbon Dioxide to Chemicals Technologies .....	19
3.1 Typical Characteristic Syngas Composition .....	38
3.2 Glycolysis and TCA Cycle: Successive Enzymatic Reactions .....	64
3.3 Ethanolic and Lactic Fermentation Reactions .....	65
3.4 Glyoxylate Cycle Reactions.....	66
3.5 Highest Yields Reported for the Selected Microorganisms.....	72
3.6 Algae Industry Status of Development.....	87
3.7 Algae Industry Supporters Status of Development .....	89
3.8 Composition of Selected Microalgae.....	98
3.9 Oil Yield and Oil Content of Various Biomass Feedstocks .....	112
3.10 Profile of Global Stationary CO <sub>2</sub> Sources (< 0.1 TPA CO <sub>2</sub> ) .....	113
3.11 Profile of U.S. CO <sub>2</sub> Emissions from Stationary Sources .....	114
3.12 Cell Densities of Heterotrophic Algae for PUFAs (Polyunsaturated Fatty Acids) .....	120
3.13 Algae Harvesting Options.....	121
3.14 Common Algae Drying Schemes .....	122
3.15 Biochemical Carbon Fixation Pathways .....	136
3.16 Theoretical Yields of Ethanol Production Using Reductive Acetyl-CoA Pathway .....	138
3.17 Non-Transformative Uses of Carbon Dioxide .....	167
4.1 Prices for Main Feedstock, Byproduct, and Utilities Inputs to Models .....	170
4.2 CAPEX Comparison Table.....	171
4.3 CO <sub>2</sub> to Chemicals and Fuels USGC Economic Competitiveness .....	174
4.4 USGC Returns on Capital Employed (ROCE) .....	174
4.5 CO <sub>2</sub> to Chemicals and Fuels Brazil Economic Competitiveness .....	178
4.6 Brazil Returns on Capital Employed (ROCE).....	179
4.7 CO <sub>2</sub> to Chemicals and Fuels Western Europe Economic Competitiveness .....	183
4.8 Western Europe Returns on Capital Employed (ROCE).....	184
4.9 CO <sub>2</sub> to Chemicals and Fuels China Economic Competitiveness .....	188
4.10 China Returns on Capital Employed (ROCE) .....	188

# NexantThinking™

## Biorenewable Insights

Nexant, Inc. ([www.nexant.com](http://www.nexant.com)) is a leading management consultancy to the global energy, chemical, and related industries. For over 38 years, Nexant has helped clients increase business value through assistance in all aspects of business strategy, including business intelligence, project feasibility and implementation, operational improvement, portfolio planning, and growth through M&A activities. Nexant has its main offices in San Francisco (California), White Plains (New York), and London (UK), and satellite offices worldwide.

### Contact Details:

**New York:** Steven Slome

Phone: + 1-914-609-0379, e-mail: [sslome@nexant.com](mailto:sslome@nexant.com)

**London:** Sonia Ouertani, Client Services Coordinator, E&CA-Products

Phone: + 44 (0) 20 7950-1587, e-mail: [souertani@nexant.com](mailto:souertani@nexant.com)
